Profile Summary

An optimistic individual with knowledge of React Native, App and Web Development. A problem solver with skill in data structures and algorithms and inclined to learn the Web technologies. Seeking for an opportunity which provides me with a platform where I can use my technical acumen along with a scope to improve my skills and knowledge.

PROJECTS

JB GROCERY APP: This is a Shopping App, Where we can buy daily needs things like vegetables, fruits and other daily needs things. Made this app by using React native framework. use React native in typescript form for front-end and AWS is used for the backend.

Home Science College Website Clone: In This College Website Clone, I made frontend of Home Science college by using HTML and advanced CSS.

(https://github.com/Vaibhav-raj-gupta/small_project/tree/main/hsc%20jbp)

VCART.COM WEBSITE DESIGN : This is Like a Shopping Website, I only made frontend of website by using HTML and CSS.

(https://github.com/Vaibhav-raj-gupta/small_project/tree/main/codes/v_cart_online_shop_design)

SOME SMALL PROJECTS: I made more small projects using HTML, CSS and JAVASCRIPT. I made Carrom Board, Chess Board, Name Smoking Effect, Calculator, Analog Clock, moon Effect, Ludo Board Design, Sunset Effect, Indian Flag Design and more.
